

## **Introduction**

We are happy to inform that PGI-EM (Penang Government Initiative – Environment Management) will be organizing an environmental bioremediation project & awareness campaign called “One Million Apologies To Mother Earth”.

One million EM (Effective Micro-organism) mudballs will be made and will be thrown into designated rivers around Penang at the same time on August 8, 2009. “One Million Apologies To Mother Earth” is going to be one exciting environmental project in Penang. With due respect to all, we are all guilty in contributing to Penang Island’s lost of shine. So, come and get your hands dirty. Join us in an effort to bring back the shine of our beloved Isle of the Orient.

## **EM® Technology**

Japan has used EM® technology to clean up more than one hundred (100) polluted rivers over the last 20 years. EM® is a proven technology in environment management and all the rivers that have been treated with EM® in Japan have also managed to resuscitate aquatic life, bringing back all the fishes and other water life forms and aquatic plants.

EM® mud balls are made from ordinary clay, EM® Activated Solution and rice bran with small quantity of molasses. EM® mud ball is a very effective composite material for cleaning rivers and waterways.

Whilst back to our home ground, Hunza Properties have also used EM on Sungai Kelian – a river located next to Hunza Properties’ Infinity project in Tanjung Bungah. The results shown as below :-

Before EM – End of March 2009

After EM = Beginning of July 2009

Note the base of the river, the 50 years old slug all gone in 3 months. We are currently waiting for a confirmation from Jabatan Pengaliran Sungai to confirm the classification of Sungai Kelian. We will update all accordingly on the progress.

### **EM® Mudballs sessions**

Under this campaign, Hunza Properties Berhad and FIABCI will be assisting in the co-ordination of for 400,000 EM®\_ mudballs to be produced in the month of July 09 and these together with the other 600,000 mudballs made by various organizations will be thrown into various rivers in Penang on August 8, 2009.

Mudballs making sessions will be on-going in the month of July 09. It will be held at Gurney Paragon, from 10am to 7pm daily. The cost of each mudball is RM0.10 which includes the cost of setting up, raw material and one basket for 250 mudballs. The team in Hunza Properties will get all items ready and all you need to do is just come over, pay and get rolling.

We will also be receiving an official letter from the PGI-EM the above event in the next 2 days. We will keep you posted on this.

### **Other Environmental Lovers**

In case you are wondering if Hunza Properties is the only organization in Penang involved in this project, check out the following list of corporations, associations and NGOs who have pledged their commitment as follows:-

1. Soka Gakai Malaysia Penang Branch	120,000
2. Penang Adventurers Club	50,000
3. TM Meditation Centre (Penang)	20,000
4. Leos International Penang	20,000
5. Motorola Penang 50,000	
6. Golden Sands Resort 20,000	
7. Park Royal Hotel 20,000	
8. Penang Auto City 50,000	
9. G Hotel and Gurney Business Community	20,000
10. Penang Line Dancing Society and Jit Sin School	50,000

So to all Hunzakuts, business associates and fellow Penangnites, get your families and friends together and make this mudball event one of your programme this July. Let's join hands and make this event a successful one and for our beloved Isle – let's make this happen!

Call 04-6596210 or Mei/Susan @ 012-4677535, to pledge your number, find out how you can help or simply for more info.

One Million Apologies to Mother Earth - be a part of one of the most meaningful environmental event.

Together, we build a better tomorrow!

Thank you.
